

Yakityak's 6-Panel Kippah Pattern

1. Sew each lining panel wedge to the next from the grey dot to the black dot until you have only one seam left to complete the dome. Press open as you go.
2. Sew this last seam in two parts. Sew from the grey dot 1/3 of the way toward the black dot. Sew from the black dot 1/3 of the way toward the grey dot. There should be a gap left in the middle.
3. Sew each exterior panel wedge to the next from the gray dot to the black dot. Complete the disk. Press open as you go.

4. OPTIONAL STEP: Set your machine to a medium width zigzag. With kippah exterior facing right-side-up, zigzag top-stitch over the seam-lines to keep them flat and close any hole that might remain in the center. I find it easiest to begin the top stitching at the crown rather than the rim. Your mileage may vary.
5. Sew the lining to the exterior right-sides-together.
6. Turn the kippah right side out through the gap you left in the lining.
7. Using a wooden stiletto or point turner to force the edges out, press the edge of the kippah.
8. Edge stitch around the kippah's rim.
9. Mattress stitch the gap in the lining closed.

Required Materials:

- Less than 1/8th yard bleached muslin for lining
- Less than 1/8th yard quilting cotton or other stable (non-stretch) material for exterior
- Quality thread in matching colors
- A tailor's ham makes pressing a lot easier
- Optional: interfacing if you prefer a stiffer kippah (fuse or baste interfacing to muslin and treat as one)

Notes:

- Be very meticulous about cutting. Your mistakes will be amplified by 6X.
- The child size is truly for the smallest people. Most people over the age of 5 should use the adult size.
- Since this is a 6-panel kippah, you can get a vague star pattern by using striped fabric on an angle.
